## Statements about approved storage of end-of-life Li-batteries

Dear Mr. László Kiss,

Herewith we state that we as your contract partner have been storing end-of-life Lithium-Ion-batteries (as waste) in open air in our sites in Germany in accordance with our valid permits, the German regulation and technical rules applicable, eg. TRGS 510.

Our own experience shows that an open-air storage concept can be a safe solution for storing end-of-life Li-batteries.

With kind regards,

Dr. Martin Reichstein  
General Manager
